Light and reversible sports seat

Productimages:

A modern and large sports stroller which is delivered with the matching carrycot and which can be combined with the i-Size iPro baby car seat. Apollo is the ideal city companion on ball bearing wheels that loves to change direction. And with its soft fabrics, everybody will love it! Thanks to its extra small folding size, it is also the perfect travel companion.

Driving fun from the start. Apollo is particularly wide and thanks to the extremely large seating and lying surface, even older children will profit from optimum freedom of movement of head and legs. The high-quality ball bearing and puncture-resistant wheels are easy-running and promise true driving fun from the very beginning! The front wheels are larger than the rear wheels guaranteeing smooth driving. They are also swiveling and lockable making Apollo particularly agile. In addition, the reflectors will bring you home safely when dark. And what's more: Apollo and sports seat can be easily folded down compactly with One-Hand-Fold making its transport even easier.

Comfy Apollo carrycot. In combination with the carrycot, Apollo can be used right from the birth of your little one. It is easy to fix on the Apollo chassis and its soft mattress and high-quality padding will give your little treasure a feeling of safety right from the start.

Two directions - both comfortable. The sports seat is particularly light and therefore easy to reverse. This way, your little one can choose between looking at you or at its surroundings. The high-quality fabrics are soft and comfy, but nevertheless very durable. The backrest can reach the lying position by using one hand only and the footrest can be pushed upwards. And when the canopy is pulled forward, it offers maximum protection against sun, wind and rain. The set also includes a footmuff that offers additional protection. The push handle is height-adjustable and can be therefore adjusted individually to mum and dad. And what's most important: 5-point belt and front bumper guarantee your little offspring's safety at all times, while the parking brake offers stability during your stops.

Mix & Match. CLEVER COMBINATIONS with i-Size iPro Baby or iPro Baby Set.

iPro Baby - BABY CAR SEAT. For your newborn, we recommend the separately available iPro Baby which has been tested according to the most recent i-Size norm and which can be used much longer than any traditional baby car seat. Combining iPro Baby with the Apollo chassis results in an agile Shop'n Drive System that allows you to go for a stroll even in small shops. And in your car, it offers maximum safety thanks to its modular side-impact protection system.

iPro BASE. When using iPro Baby in your car, we recommend the iPro Base as complement. Alternatively, it is also available as iPro Baby Set, consisting of the iPro Baby car seat and iPro Base. And what's more: the base is also usable for the iPro Kids car seat.

Maxi Cosi Adapter. Those who have a Maxi Cosi baby car seat can fix it on the Apollo chassis by using the separately available adapters (Maxi Cosi Adapter - Apollo).

Up to 25 kg. You can now use the Apollo stroller for a very long period, because it carries

up to 25 kg. This means we are voluntarily satisfying requirements over and above legal standards.
