Seat insert with anti-slide protection  
Depth-adjustable food tray with cup hole and elevated edge  
Removable tray

## Productimages:

---

Fits perfectly. A practical food tray that is compatible with our wooden high chairs Alpha+ and Beta+. From now on, your little one can eat at the own table.

Sit safely. The middle bar of the Alpha Tray's seat insert prevents your child from sliding down. Additional lateral restrictions guarantee your child's safety. Installing the Alpha Tray on your high chair is feasible with few actions only .

Adjustable and removable. The tray can be altered in 3 different depths an thus adjusted to your child's height. The tray's edges are elevated as to not let fall down anything. The tray is simply put on the tray's base and can be removed as easy in order to wash it or when you just do not need it.

Removable upper tray. The upper tray, which is also included, has also a elevated edge and a practical cupholder to keep everything in order. Should you need it, you can simply remove it for washing. While washing this upper tray, you can keep your child on the high chair as you don't need to remove the whole tray.
