- Headrest adjustable in 6 heights (incl. belt system)
- 4x adjustment of inclination angle forward-facing
- High quality and breathable stretch cover

Productimages:

This set consists of the iPro Kids car seat and the iPro Base. The extremely flexible iPro Kids car seat has been approved according to the newest i-Size regulation R 129. It is a fully-fledged rear-facing car seat for children with a body size of 40 - 105 cm. From a body size of 76 cm, iPro Kids can also be used as a forward-facing car seat. Thanks to its large size, the iPro Kids car seat can be used for a very long time. In addition, it is part of the iPro Series that also includes the iPro Baby infant car seat.

The iPro Kids car seat is equipped with a 5-point harness, as well as a new type of energy-absorbing materials that efficiently absorb frontal and side impacts. These are part of the seat's modular side-impact protection and protect your child in the head, neck, chest, and belly area. And thanks to the steel-reinforced inner part, iPro Kids is particularly safe.

In vehicles, iPro Kids can be fixed only with the separately available iPro Base. The iPro Base is to be locked with a stand and is easy to attach to the vehicle's Isofix connectors. This same base can also be used for the iPro Baby infant car seat. Both iPro Baby and iPro Kids are put on the base with the Easy Slide Function, where special guides ensure a correct installation. Coloured indicators also indicate whether the seat has been correctly installed and locked. In order to unlock the seats from the base, you need to push the button that can be found in the middle.

The little passenger's well-being is also guaranteed thanks to high-quality and breathable fabrics. The seat's inclination angle can be adjusted in 4 positions, from seat to lying position, in the direction of travel. The headrest has also 6 height adjustments. The harness can be adjusted the same in height. In addition, iPro Kids is delivered together with a removable newborn insert and another two-part insert.
