

Include:

Door gate

Highlights:

XL fireplace guard 267 x 75 cm

Locking mechanism with double safety catch

Door opens to both sides with one hand

4 Lateral parts and 1 door element

Productimages:

With the Fireplace Guard XL, you can confidently let your child play by the fire because the protective grid securely prevents access to this area.

If mum or dad need to get to the fire, they have to unbolt the door that is secured with a two-way, manual bolt mechanism. The door can be opened in both directions and then reliably locks back into the childproof catch.

The Fireplace Guard XL is supplied with four side elements, a door element and assembly materials. There are various positioning options, but both ends of the protective grid must be attached to the walls.

The protective grid reliably keeps children and pets away from the fire. The Fireplace Guard XL is 2,67m long in total, heat-resistant, stain-resistant and can be wiped with a damp cloth.
