Shock-absorbing side-impact protection system with memory foam + air-pocket system
7x height-adjustable headrest with integrated side wing width adjustment
ISOFIX CONNECT fixation
Optimized seat belt guide (diagonal belt)

Productimages:

The Bodyguard Pro keeps your child as safe as possible with its innovative Crash-Absorbing system. The grow-with-me, ECE Group II/III car seat can be used for children from around 3-12 years or weighing from 15-36kg. Bodyguard PRO is approved in accordance with the current car seat regulation ECE 44/04 and is suitable for all vehicle seats fitted with a standard 3-point belt system.

ISOFIX CONNECT System. Because it is fitted with our ISOFIX CONNECT System, the Bodyguard PRO can quickly and easily be connected to the vehicle's ISOFIX connection hooks. This keeps the seat in the correct position. It is always safely secured, even when empty.

Innovative security. The Bodyguard Pro is fitted with our innovative Crash-Absorbing system. Memory foam provides optimum protection in the head area. This additional layer has an impact and shock-absorbing effect, combined with the polystyrene cushion, so it achieves outstanding test results in front and side impacts. Bodyguard Pro is also equipped with our new air-pocket system, which also has an impact and shock-absorbing effect, because only controlled escape of the air there is possible through the openings.

Grow-with-me. Bodyguard PRO grows with your child, because it can be individually adjusted to your child's height. All of the settings can be made with one hand, to make the journey as pleasant as possible for your child. The headrest has 7 different height settings. As you adjust the height of the headrest, the width of the side wings also gradually changes. The seat belt guide has been optimized for the diagonal belt. It keeps the belt where it is supposed to be, not at the child's neck.

Sit in comfort. High-quality, breathable, stretch materials have been used, so that your little one always feels comfortable in the car seat. The materials are moisture-regulating and can be removed and washed.

Close at hand. There is space for a bottle in the standard cup holder. You can choose to mount the cup holder on the right or left side of the car seat, where your child can always reach it.
