The safety gate Open'n Stop offers child-friendly safety at home. The attachment is done in the twinkling of an eye. The metal gate is clamped by pressure mounting between walls or doorways. Drilling and screwing is not necessary.

The Open'n Stop Safety Gate is suitable for widths from 75 to 80 cm and has a two-fold manual locking mechanism. It can be opened with one hand and locks reliably in a childproof closure.

The Open'n Stop Safety Gate is TÜV-certified and offers optimum safety.

With separately available extensions, the gate can be individually extended and used as a stair gate. If you have a stair railing with round bars, you can attach the safety gate next to the extensions of 9 and 21 cm with the separately available Y-spindles.

The following dimensions and combinations are possible:

- 75 - 80 cm = safety gate without extensions
- 84 - 89 cm = gate + 9 cm extension (separate)
- 93 - 98 cm = gate 9 cm extension (separate) + 9 cm extension (separate)
- 96 - 101 cm = gate + 21 cm extension (separate)
- 105 - 110 cm = gate + 9 cm extension (separate) + 21 cm extension (separate)
- 117 - 122 cm = gate + 21 cm extension (separate) + 21 cm extension (separate)

If you use the hauck Y-spindles in combination with the 9 cm and 21 cm extensions, the same options are possible.

#### Note:

This item is a self-adjusting gate. This means that the inclination of the side part is eliminated by tightening the locking screws in the frame. This way, a secure hold and a parallel fixation of the side parts in the region of the closing mechanism is enabled.
