Open'n Stop stair gate comes with a 21cm extension. This means that it can be used for door frames and landings with widths of 96 - 101cm.

Assembly is quick and easy. The metal gate is clamped between walls or in door frames with fixing screws. No drilling required.\*

Open'n Stop has a double manual locking mechanism. It can be opened with just one hand and engages reliably into the childproof lock.

With separately available extensions, the gate can be individually extended and used as a stair gate. And if you have a stair railing with round bars, you can attach the safety gate next to the extensions of 9 and 21 cm with the separately available Y-spindles.

Opening dimensions with extensions:

75 - 80 cm = gate without extensions

84 - 89 cm = gate + 9 cm extension

93 - 98 cm = gate + 2 x 9 extension

96 - 101 cm = gate + 21 cm extension

105 - 110 cm = gate + 9 cm extension + 21 cm extension

117 - 122 cm = gate + 2 x 21 cm extension

The same dimensions result from using the hauck Y-spindles in combination with the 9 cm and 21 cm extensions because they replace the fixing screws.

Note:

This item is a self-adjusting gate. This means that the inclination of the side part is eliminated by tightening the locking screws in the frame. This way, a secure hold and a parallel fixation of the side parts in the region of the closing mechanism is enabled.
